

SmartFlow/SmartCheck/DVVI/IVNV 3.1 Release Notes

4/8/2017

SmartFlow/SmartCheck/DVVI/IVNV are industry leading Digital Inspection and Workflow Management solutions

System requirements and dependencies

- None specific to any bug fixes below

Fixes

- Wrong goal hours per half-month payroll
 - Half-month payroll now calculates automatically the duration of the pay period
- Delay in showing inspection results
 - Under special circumstances the inspection result shows up with a considerable delay. This has been fixed.
- Fixed time interval in Inspection Metrics graph from 6 days to 7 days
 - The time interval for the trend graphs using the previous pay period setting has been changed from 6 to 7 day interval
- Formatting of name
 - If a the customer is a company, the text message greeting used the shop's name as last name of the service advisor, this has been fixed.
- Inspection revisions
 - Under certain circumstances inspection revisions were shown as conflict, which were not in conflict. This has been fixed.

Changes

- Sort Special markers alphabetically
 - Special Markers are now shown in alphabetical order, which makes it easier to spot them
- The SmartFlow/SmartCheck installation includes the installation of the SmartFlow Add-On provisioning on the server
 - This will allow all clients to install the SF Add-On from the TVP in a later step.
