

SmartFlow/SmartCheck/DVVI/IVNV 3.2 Release Notes

4/29/2017

SmartFlow/SmartCheck/DVVI/IVNV are industry leading Digital Inspection and Workflow Management solutions

System requirements and dependencies

- None specific to any bug fixes below

Fixes

- DVVI/IVNV NAPA Canada support iOS 10.3
- Any job on the work order in Drop Off or Inspect State can trigger a Smart Marker (not only newly added ones) see also <http://help.autovitals.com/using-smart-markers/>
- If Tech and SA edit the notes at the same time, the edits are getting merged instead of the last edit wins
- Unwanted movement in chrome browser when editing tech notes and pressing ok in Chrome browser has been fixed.

Changes

- Inspection History is shown on the tablet in the service history section
